uvex pheos family

Original and the best

uvex's most popular safety eyewear range

In addition to its attractive design, the uvex pheos safety glasses incorporate highly innovative technology: the core component is the duo-spherical lens, which not only offers a wide field of vision but is extremely scratch-resistant on the outside and permanently anti-fog on the inside thanks to uvex's proven unique coating technology.

Exceptional eye coverage
The duo-spherical lens has additional curvature at the upper edge providing an integral brow guard for further coverage.

Enhanced ventilation
The unique side arm design provides excellent ventilation - helping to improve the climate around the eye.

Comfortable and secure
Hard and soft components used for the side arms deliver outstanding comfort and stability.

High performance hinges
The metal-free hinges fold effortlessly with a consistently smooth movement guaranteed.

When one size doesn't fit all

uvex pheos safety eyewear is a universal solution for all wearers and is available in two sizes. The pheos s small version is 8mm narrower than the standard width, making it ideal for those with smaller faces.

uvex

uvex UV400

100% UV protection. 100% safety. 100% uvex.

The EN166/170 standard specifies safety eyewear should provide UV protection up to 380 nm. The WHO* and latest scientific studies state that this level of protection is insufficient and recommend safety eyewear lenses provide UV protection up to 400nm covering UVB and UVA rays.

”

“The reasons why the WHO recommends UV400 protection are clear. The outer tissues of the eye, cornea and lens fully absorb UV light. While UVB light primarily damages the genetic material, UVA rays penetrate deeper, cause thermal damage and magnify the effects of UVB light.”

Univ.-Prof. Dr. rer. nat. Olaf Strauß

“

uvex UV400 – included in all uvex safety eyewear

Regardless of whether you choose a clear or tinted lens, all uvex safety eyewear has UV absorption incorporated in the lens which filters 100% of UV rays up to 400nm. uvex which stands for **ultraviolet exclusion**, prides itself on delivering the best possible protection together with top-quality lens coatings, incredible comfort and stylish designs.

Even without sun, UV rays can still put strain on the eye

When working outdoors, your eyes are regularly exposed to harmful UV radiation – even when it is cloudy. The result: using insufficient protection may cause dangerous long-term damage such as corneal injury, cataracts and loss of sight.

100% protection against dangerous UVA and UVB radiation

For the eye and surrounding skin

Radiation in nm

uvex UV400

uvex UV400 offers complete protection against UVA and UVB radiation as well as high-energy visible light (HEV) up to a wavelength 400 nm.

uvex UV400 not only filters 100% of UVA rays (20% still passes through 380 nm lenses), it also completely minimises temperature-induced cell changes – a factor which increases tenfold in the percentage of total cell damage in the range from 380 to 400 nm. In addition, the dangerous, damaging blue light content (HEV), which is also harmful to the retina, is reduced by 15%.
