

3M™ Versaflo™ Powered Air Respirator Systems

Enhanced comfort. Versatile protection.

It's important to keep your employees safe whilst working in hazardous conditions. That means providing them with protection that's ergonomic, comfortable and versatile - a Powered Air Respirator System. 3M™ Versaflo™ Powered Air Respirator Systems: Designed for comfort. Powered by innovation.

Comfort

Challenging environments are part of the job. But with Powered Air Respirator Systems, your workers may experience added comfort wearing their 3M compatible Personal Protective Equipment (PPE), which may help to reduce workplace injuries and improve compliance.

Ease

Easy to buy, easy to use and easy to maintain, Versaflo™ Powered Air Respirator Systems make for an easy choice.

Versatility

From heavy industrial applications to highly precise healthcare uses and everywhere in between, Versaflo™ Powered Air Respirator Systems offer an integrated system you can easily customise.

With user-selectable airflow rates, rugged construction and a comfortable design that will see you through the entire shift, the 3M™ Versaflo™ Powered Air Turbo TR-600 helps provide durable protection in harsh environments where protection is needed from particulates, gas and vapours. Thanks to comprehensive research and an in-depth understanding of your needs, we created the most advanced, versatile solution yet. Simply put: It's designed to help make breathing and working easier.

Selectable airflow.

Workers can control their experience by selecting from various airflow speeds as well as how air is delivered in certain headtops.

User-friendly interface.

Monitor the status of your filter, the charge of your battery and airflow setting at a glance.

Advanced alerts.

Audible and visual alarms alert you to filter load and low battery. Vibratory alarms on the 3M™ Versaflo™ TR-600 offer added alerts that may be useful in loud environments or if your employee is unable to hear an alarm.

Intuitive interactivity.

Colour indicated touchpoints of system components allow for easy identification.

Facial hair.

Workers with limited facial hair can be accommodated with certain headtops.

Prescription eyewear.

Employees with prescription safety eyewear can keep their glasses on under loose-fitting headtops.

Whenever the job takes your people into a potentially explosive area – whether from flammable gases and liquids or combustible dust – ignition from an electrical source could trigger a disaster. Now, with the introduction of the 3M™ Versaflo™ TR-800 Powered Air Purifying Respirator (PAPR), you can give the people in your care a high level of respiratory protection and help minimize the risk of fire or explosion.
