- Rubber/Neoprene – hi vis and 360 safety reflective

Outsole:

- K12 Rubber Outsole

Lining:

- Aerspencer breathable lining – hi vis colour for roll down safety

EN/UKCA Certification:

- S5 HRO CI HI AN SRC

Weight (based on size 9):

- 2,828 grams

Sector Use:

- Agriculture • Construction • Engineering
- Maintenance • Trades • Utilities

Features & Benefits:

BBZ8000 uses a completely different assembly process from its older brother, BBZ6000 plus a host of new safety features and lightweight components. In addition, it's 360° reflective, non-metallic and has built in EN certified Ankle impact protection (AN) and Achilles support. AN certified protection should not be confused with Ankle support claims although its incorporation in our BBZ8000 specification provides both impact protection AND support to the Ankles and Achilles areas as well as providing a snug fit of a quality which consigns floppy unsupported safety wellies to history. This Ankle support fitting is an area of particular focus for The Health & Safety Executive in respect of site work. Cold Insulation (CI) and Heat Insulation (HI) certification ensures all-day comfort. BBZ8000 features a super lightweight nano safety toecap, a lightweight anti-penetration midsole and a weight saving sole bonding process. It's comparable in weight to its moulded polyurethane competitors and just like its older brother it fits like a glove, not like a tube. See our exciting new BBZ8000 video where BBZ8000 tackles an extreme heat/wet cement test
